

Commercial Bank of Dubai (“CBD” or “the Bank”) supports the UAE’s “Net Zero by 2050” strategic initiative and is proud to be a signatory of the UAE’s Ministry of Climate Change and Environment Sustainable Companies Pledge and United for Wildlife’s Mansion House Declaration. We have baselined our greenhouse gas emissions across scopes 1, 2, and 3, and committed to achieving carbon-neutral operations by 2030, by reducing greenhouse gas emissions from our own operations.

We are committed to:

- Supporting projects and businesses that are transitioning to a low-carbon economy or contributing to broader environmental objectives in line with the Bank’s Sustainable Financing Framework and Sustainable Finance practices.
- Integrating environmental considerations into our operations, decision-making, and lending and investment strategies.
- Reducing emissions, pollution, and waste from our own operations. Importantly, this includes working towards improving the energy efficiency of our buildings.
- Providing complete, transparent, and timely reporting on our environmental performance, opportunities and risks with internal and external stakeholders.
- Promoting environmental awareness and environmental stewardship with internal and external stakeholder groups, including empowering our employees and encouraging our customers and suppliers to take positive action.
